# Getting Started

## Farm Risk Radar

Risks are modularised for easy completion

Identify Risks > Risk Radar Results > Action Plan > Summary

### Step 1 of 4 - Identify Risks

#### Helpful Hints

Risk Radar is made from several smaller modules that you can complete in your own time.

There are a series of questions to answer which are automatically saved. You can easily stop at any point and come back to it later.

#### Your Actions

- ▶ Review your progress.
- ▶ Click the title to begin that module.

If you're just starting out, begin with the first module listed and work your way down (or click 'Next').

The system automatically moves you through each module as you complete the last. Remember, you can always stop at any point and return to where you last left off.
